

SAVE ENERGY, WITHOUT COMPROMISE

PRO AWARDS '14

True savings with the new intelligent Etherea heat pump

ECONAVI INTELLIGENT ECO SENSORS

1. NEW TEMPERATURE WAVE
2. AREA SEARCH
3. ACTIVITY DETECTION
4. ABSENCE DETECTION
5. SUNLIGHT DETECTION

We believe that going green shouldn't compromise on comfort. That's why Panasonic is introducing the new Econavi system; combining human sensor and control program technology to detect and reduce energy waste by 38% .

Our super silent air conditioners guarantee the purest air to take care of you and your family. And, for a cleaner living environment, the new Anti-allergy Nanoe-G, tested by the UK Allergy Association, helps purify the air as well as your surroundings. Together, these breakthrough technologies define what Panasonic's Eco Clean Life Innovation is all about – innovations that improve our environment while making life as comfortable as possible.

Do you have the best project with Panasonic heating and cooling systems?

You could win the prestigious Panasonic PRO Award 2014. Great prizes are waiting for you - make sure you enter to have a chance of winning...
